

Eu trabalho com a NeuronUP!

A NeuronUP é uma plataforma web de neurorreabilitação projetada para atuar como suporte fundamental aos profissionais envolvidos nos processos de reabilitação e estimulação cognitiva.

A laptop and a tablet are shown displaying the NeuronUP platform. The laptop screen shows the homepage with a banner about leading centers choosing NeuronUP, logos for partners like Sanofi and Ruber, and a circular image of a smiling professional. The tablet screen shows a cognitive task interface with a keyboard at the top, a form for entering name and date, and a list of instructions. Below the instructions is a visual discrimination task where users must determine if shapes are inside or outside a outline. The overall theme is professional and user-friendly.
